S.ajaya Influencer Connect

JavaScript file (script.js) — PDF guide

This PDF contains the JavaScript code to use with your website. Save the code as **script.js** and upload it to the root folder of your GitHub repository.

What this script does

• Opens and closes a mobile navigation menu (if your HTML has the matching classes).
• Smoothly scrolls to sections linked with # anchors.
• Opens WhatsApp with a prepared enquiry message.
• Opens the visitor’s email app to compose a contact-form enquiry.
• Displays the current year in footer elements marked data-current-year.

Important setup note

Your **index.html** must load the script before the closing body tag:

```
<script src="script.js"></script>
```

The HTML must use matching selectors such as .menu-toggle, .nav-links, [data-whatsapp], and #contact-form for the related features to work. The email form opens the visitor’s email app; it does not send mail directly from the website.

Full script.js code

```
/* S.ajaya Influencer Connect */

document.addEventListener("DOMContentLoaded", function () {
  // Mobile navigation
  const menuButton = document.querySelector(".menu-toggle");
  const navigation = document.querySelector(".nav-links");

  if (menuButton && navigation) {
    menuButton.addEventListener("click", function () {
      const isOpen = navigation.classList.toggle("active");
      menuButton.setAttribute("aria-expanded", String(isOpen));
    });
  }

  // Smooth scrolling for internal links
  document.querySelectorAll('a[href^="#"]').forEach(function (link) {
    link.addEventListener("click", function (event) {
      const target = document.querySelector(link.getAttribute("href"));

      if (target) {
        event.preventDefault();
        target.scrollIntoView({ behavior: "smooth" });

        if (navigation) navigation.classList.remove("active");
        if (menuButton) menuButton.setAttribute("aria-expanded", "false");
      }
    });
  });

  // WhatsApp contact buttons
  document.querySelectorAll("[data-whatsapp]").forEach(function (button) {
    button.addEventListener("click", function () {
      const phone = "917815070156";
      const message =
        "Hello S.ajaya Influencer Connect! I am interested in your influencer marketing services.";

      const url = "https://wa.me/" + phone +
        "?text=" + encodeURIComponent(message);

      window.open(url, "_blank", "noopener,noreferrer");
    });
  });

  // Contact form: opens the visitor's email app
  const contactForm = document.querySelector("#contact-form");

  if (contactForm) {
    contactForm.addEventListener("submit", function (event) {
      event.preventDefault();

      const name = contactForm.querySelector('[name="name"]')?.value.trim();
      const email = contactForm.querySelector('[name="email"]')?.value.trim();
      const service = contactForm.querySelector('[name="service"]')?.value.trim();
      const message = contactForm.querySelector('[name="message"]')?.value.trim();

      if (!name || !email || !message) {
        alert("Please fill in your name, email, and message.");
        return;
      }

      const subject = encodeURIComponent("Website enquiry from " + name);
      const body = encodeURIComponent(
        "Name: " + name +
        "\\nEmail: " + email +
        "\\nService: " + (service || "Not specified") +
        "\\nMessage: " + message
      );

      window.location.href =
        "mailto:s.ajayainfluencerconnect@gmail.com" +
        "?subject=" + subject + "&body=" + body;
    });
  }

  // Current year in the footer
  document.querySelectorAll("[data-current-year]").forEach(function (element) {
    element.textContent = new Date().getFullYear();
  });

  console.log("S.ajaya Influencer Connect website loaded.");
});
```
